

Investment opportunities across Europe for investors worldwide

The Investment Plan, through its financing arm – the European Fund for Strategic Investments (EFSI) – provides investors with the opportunity to invest in high-quality infrastructure and innovation projects as well as SMEs across Europe. This investment takes place alongside a AAA-rated institution with a proven track record and unique experience in European markets: the European Investment Bank (EIB) Group. The EIB Group takes a significant share in the overall risk in solid, economically- and financially-viable projects selected by a committee of independent market experts, and the EFSI provides a first-loss guarantee. EFSI projects are open to investors worldwide.

A vast portfolio of sectors and countries

Through the EFSI, investors can find the opportunity that suits them best. Investment opportunities are available across the EU and include a vast range of sectors – from digital, transport and energy to education, health, research, development and innovation, to renewable energy and resource efficiency, to support to start-ups and SMEs. Investors can co-invest in individual projects or in investment platforms with a thematic or regional focus to benefit from significant economies of scale.

The Investment Plan for Europe

The EU has launched an initiative to restart growth, create jobs and revive strategic investment in key sectors in Europe. The Investment Plan for Europe provides new opportunities for investors in the EU and abroad by:

- making smarter use of financial resources;
- providing visibility and technical assistance to investment projects;
- removing sector-specific and administrative barriers to investment.

The Investment Plan for Europe – what's in it for investors?

Let's #investEU

A transparent pipeline of European investment projects

In addition to co-investment opportunities with the EIB Group, the European Investment Project Portal (EIPP) provides investors worldwide with a free, publicly-available web portal where investment opportunities in Europe can be found. It offers advanced search and filtering criteria, making it easy for investors to find projects according to their own preferences. The projects displayed on the Portal are worth at least €10 million and cover high-potential sectors such as infrastructure and innovation.

The Portal is available at <http://ec.europa.eu/eipp>

For investment opportunities in infrastructure, please contact the EIB directly:
<http://www.eib.org/infocentre/contact/offices/index.htm>

For investment opportunities in equity funds targeting start-ups and SMEs, please consult the equity intermediaries active in your country of interest:
http://www.eif.org/what_we_do/where/index.htm

Technical assistance for high-quality projects

Through the European Investment Advisory Hub (EIAH), the EIB and the Commission are providing technical assistance and tailored advice to private and public project promoters. This will generate more and better investment opportunities in Europe, including cross-border projects and those in innovative and high-potential sectors.

The Hub is available at <http://www.eib.org/eiah/>
